

BENTEN WATER SOLUTIONS

BENTEN WATER SOLUTIONS

Benten Water Solutions supports water utilities and industries in helping them better understand water quality, by supporting the design, implementation and management of - online or offline - monitoring systems. To this end, we have developed an online database of water quality sensors and monitors, providing a complete overview of commercially available online instrumentation for water and wastewater industries. We also provide validation and verification services to sensor manufacturers and carry out technical due diligence and market insights for investors. Additionally, Benten Water Solutions is a Test Body under the European ETV Programme and an implementation partner for the European Water Stewardship Standard.
