imagine

WaterLink 2017 An event that will stretch our imagination. Dare to dream, set a new course, chase new opportunities. Where would innovations come from when we stop using our imagination?

Imagine

WaterLink is the annual symposium of the Water Alliance. The 5th edition of WaterLink will be held on January 26th 2017. The symposium has a strong and appealing formula condensed into a one-day event with four main ingredients:

One inspiring plenary session

with keynote speakers providing insight into new ways of thinking and focused presentations from entrepreneurs competing for Water Alliance Innovation Stimulation Award.

We are proud to announce that three time Olympic Swimming Champion Pieter van den Hoogenband is one of our keynote speakers!

Eight interactive theme sessions

running in parallel, so all Waterlink participants can join a session of their choice, providing the opportunity to discuss current issues on the theme/topic of their expertise/interest.

Theme sessions:

- Energy and Water
- Algae Toxins
- Real Time Monitoring
- Industry and Water
- International Marketing and Communications
- The Agri-Watercycle
- Accelerating Resource Recovery from the Water Cycle for a Circular Economy
- Smart Water Cities

Dedicated match-making sessions

the opportunity to have pre-arranged meetings with new potential business partners.

Informal networking opportunities

during natural breaks for coffee, lunch and dinner, but also on the exhibition floor.
