BEENEN INDUSTRIAL  
AUTOMATION

Beenen Industrial Automation is a system integrator that offers its clients integrated automation solutions for increased safety and efficiency in manufacturing and industrial processing.

Many years of experience have resulted in a large number of satisfied customers in the industrial and water sector.

With some 200 passionate employees, divided over two locations in Heerenveen and Zwolle, we supply control installations to clients in, among others, the market segments of water, food/feed, chemical and machine building.

Our professional expertise, the quality of our products and close involvement with our clients, have allowed Beenen to grow into a successful enterprise in the industrial automation branch.
