BRIGHT SPARK

Since its start-up in 2002, Bright Spark has become known for its innovative water disinfection systems based on the electrolysis principle, a chemically free, safe and easy way to effectively treat water against bacteria, viruses and moulds. New developments take place in close cooperation with universities worldwide. Our systems are successfully in operation in various branches, like:

- Maritime Applications (Ballast Water & Drinking Water)
- Drinking Water Industry
- Industry Cooling Tower Water Treatment
- Agricultural Sector

Our product brand names are 2B Sure, Blue Cloo, 2B Safe and APL.
