

## ECONVERT WATER &amp; ENERGY

## ECONVERT WATER &amp; ENERGY

**Econvert designs and implements technology for the treatment of industrial wastewater & biogas.**

Wastewater is a valuable source of energy and raw materials, in a world where they are becoming increasingly scarce. Econvert develops reactors for recovering & utilizing valuable resources like biogas from industrial wastewater. Founded on in-depth process knowledge, Econvert offers customized solutions. The company focuses on the food industry, paper industry, breweries and distilleries, as well as companies working with chemicals, flavors and fragrances.
