

HG ULFIMA

HG ULFIMA

HG Ulfima specialises in ultrafiltrationsystems that can safeguard the water quality. The Ulfima® is an ultra filtration machine fitted with filter modules that stop bacteria and viruses (including legionella). The membrane filtration barrier will remove all bacteria, but also most of the other forms of contamination that contribute to the creation of biofilm. This helps improve the water quality. HG Ulfima makes your water system easier to control and give you peace of mind!
